WHO SHOULD PARTICIPATE?

Students who are eager to learn about topics related to information literacy, Metaliteracy and artificial intelligence in an intercultural learning scenario.

COURSE CONTENT AND SCHEDULE

Start: July 17, 2023
End: July 28, 2023

THE TOPICS

- AI and Information provision
- AI and information evaluation
- AI and media/information literacy education
- AI usage in knowledge creation, ai as a creative tool
- AI usage in research
- AI in education, teachers and learners perspective
- AI and producing information (text/image/sound)
- AI and senior citizens

THE LEARNING TASK

As an intercultural group, create an information graphic or comic that helps citizens in your countries to understand the role and consequences of AI, enabling them to find and utilize valid information of high quality. This creation should also raise awareness about potential agendas and manipulation related to AI and foster an understanding of one's own limitations in navigating, evaluating, and using information in AI-driven society.

LEARNING REQUIREMENTS

- Most importantly, be curious and open-minded
- English language proficiency: The course is fully held in English
- A substantial time commitment is expected
- Authentic and respectful way of communicating

Participation is not guaranteed, as the number of places is limited.
